

# AIR PURIFIER

# Sharp FUY30JW

Asthma and allergy sufferers understand the importance of clean air. Animal dander, pollen and many other airborne contaminants cause and exacerbate allergies, particularly in the home. With more of our time spent indoors, reducing these substances from the air around us is important because they can impact upon our wellbeing.

The Sharp FUY30JW air purifier helps to provide a quick and powerful cleansing effect on an entire room by removing or deactivating a range of airborne allergens and other substances providing clean, safe air quality in the home up to 21m<sup>2</sup>.

**Features:**

- Powerful suction
- Simple operation
- Side grips
- Easy clean rear panel filter
- Quiet night time operation
- HEPA filter
- Power Supply 220-240V 50Hz

**TECHNICAL DATA**

|   |                                       |
|---|---------------------------------------|
| Air purifying system                                  | High density PCI generator & fan      |
| Plasmacluster ion modes                               | On/Off                                |
| Plasmacluster ion density (ions/cm <sup>3</sup> )     | 7,000                                 |
| Recommended room floor size                           | 21m <sup>2</sup>                      |
| Recommended area for high density Plasmacluster ions* | 13m <sup>2</sup>                      |
| Fan speed modes                                       | Max / med / low                       |
| Special program mode                                  | High density Plasmacluster Ion shower |
| Voltage / frequency (V, Hz)                           | 220-240, 50Hz                         |
| Power input (W) (max/med/low)                         | 49 / 32 / 23                          |
| Standby power (W)                                     | 1                                     |
| Inverter operation                                    | Yes                                   |
| Airflow (max/med/low) (m <sup>3</sup> /hour)          | 180 / 120 / 60                        |
| Air suction power                                     | 180m <sup>3</sup> / hour              |
| Noise level (max/med/low) (dB)                        | 44 / 35 / 24                          |
| Filter type – Dust collection                         | HEP & deodorising 2-in-1              |
| Filter type - Deodorising                             | Yes                                   |
| Filter life – HEPA / Deodorising                      | Up to 2 years                         |
| Sensor  | N/A                                   |
| Clean sign indicator                                  | N/A                                   |
| Light control button                                  | N/A                                   |
| Dimensions (W/D/H)                                    | 365mm x 510mm x 150mm                 |
| Net weight  | 5 kg                                  |
| Replacement filter                                    | FZY30SEF                              |

\* Size of room in which approximately 7,000 ions can be measured per cm<sup>3</sup> in the centre of the room (at a height of approximately 1.2metres from the floor) when the product is placed next to a wall and operated at the MAX operation position.
